

Enforcement Division

Presents Course # 272

Gas Turbines/Power Plants

With an increase in demand of the electric utility industry, stationary gas turbines have become more popular in recent years as combined-cycles, peaking power plants and cogeneration facilities. The course discusses uses of gas turbines, fundamentals of operation of modern turbines with emphasis on state-of-the-art controls to achieve some of the lowest emission concentrations for this source category. The course also discusses combined cycles with HRSG units, steam turbines & power generation. This is followed by a detailed discussion on emissions and control techniques such as Dry Low-NOx combustors with staged combustion, water or steam injection followed by SCR & CO catalysts. Applicable federal & local BACT regulations, permitting requirements, and agency inspection procedures & safety concerns are thoroughly discussed. Hard Hat, Safety Shoes & Glasses required.

March 30, 2005

**8:00 AM - 5:00 PM
Santa Barbara APCD
260 N San Antonio Rd #A
Santa Barbara, CA 93110
